

Master's Microeconomic Analysis I
ECON 526

Please see below for a brief overview of EconS 526. Instructors will provide a full Syllabus at the beginning of the course.

Course Overview:

This class is a Master's level course that focuses on the fundamentals of consumer and producer theory. The theories taught in class form the basic building blocks in understanding a variety of applied economics and public policy problems. Course is taught as a cooperative course between WSU and UI (AGEC 526).

Student Learning Outcomes:

Students successfully completing this course will demonstrate:

1. Mastery of core microeconomic theory pertaining to consumers, firms, and social choice
2. Ability to use game theory, calculus for comparative static and constrained optimization analysis of real-world economic problems
3. Prerequisite knowledge of microeconomic theory sufficient for other master's-level EconS courses
